“
Seize
THE OPPORTUNITY
for a better life,
and **TOGETHER,**
we will be
STRONGER !

As global evolution continues its never-ending race, we remain committed to demonstrating that each and every change can only be the beginning of a new adventure.

A conviction that we convey through a model of success aimed at all strata of society, on equal terms.

We place human dignity at the core of our aims, by providing all our partners with the fundamental means that are represented by the noble existence of our products. Furthermore, we provide them with the support and training to fulfill their professional needs and thus help them achieve **happiness.**

Through an economic model perfectly in phase with such an aspiration, Arvea Nature stands as an alternative that will not fail its promises, as long as mankind exists.

أمام سياق التطور العالمي المتواصل، نبقي حريصين على إثبات أن كل تغيير لا يمكن إلا أن يمثل بداية مغامرة جديدة.

قناعة ننقلها من خلال نموذج نجاح موجه لجميع شرائح المجتمع وعلى قدم المساواة.

اننا نجعل من الكرامة الإنسانية جوهر ما نصبو إليه من خلال تزويد جميع شركائنا بوسائل أساسية تتمثل في نبل وجودة منتجاتنا. بالإضافة إلى ذلك، نقدم لهم الدعم و التدريب المناسبين لتلبية احتياجاتهم المهنية و بالتالي مساعدتهم على تحقيق **السعادة.**

من خلال نموذج اقتصادي يتناغم تمامًا مع هذا الطموح، نعتزُّ بأرضنا الطبيعة نفسها بدلاً لن يفشل في الوفاء بوعوده، مستمراً ما دام **الإنسان** موجوداً.

اغتنموا الفرصة لحياة أفضل، ومعاً سنكون أقوى !

ALOE VERA

The Aloe vera is an extraordinary plant, used in traditional medicines in many the world's warm regions. In addition to the nutrient-rich gel from the plant's leaves, Aloe vera contains active substances, many of which are recognized as beneficial, especially for hair and skin.

Tip
To help combat hair loss, apply
ALOE VERA Gel to the scalp,
perform circular massages, and
leave it on for at least 1 hour,
covering the hair with a cap or
towel. Finally, wash with
suitable shampoo for your hair
type.

ARGAN OIL

A true gift of nature, the argan oil is extracted from the fruits of the argan tree, which mainly grows in the southwest of Morocco. It is obtained by cold pressing the seeds of the fruits.

Very rich in omega 6 and 9, it is highly nourishing, moisturizing, and helps combat signs of skin aging by activating cell regeneration and improving skin elasticity and firmness.

Argan oil is also an excellent treatment for dry and brittle hair and nails, nourishing and deeply rehydrating them right from the roots.

SHEA BUTTER

Shea butter is a fatty vegetable substance extracted from the fruit of the shea tree. It comes from a tree that grows wild in the savannas of the African continent.

The butter is obtained by mechanically pressing the nut found inside the fruit. For millennia, it has been widely used in some regions of Africa due to its multiple virtues. In addition to being edible, shea butter is used in various cosmetic applications. It brings multiple benefits to the skin, hair, and nails, thanks to its nourishing properties and antioxidant and anti-inflammatory activities.

ESSENTIAL OILS

INCREDIBLE REMEDIES
(PAIN RELIEVERS, REPELLENTS ...)

Essential oils are liquid extracts obtained by distillation from a plant that concentrates its volatile aromatic active ingredients. The analysis of their chemical composition and the properties of the aromatic molecules they contain have allowed researchers and therapists to specify the benefits and virtues of each essential oil.

They are also valuable natural remedies for inflammation or pain. Indeed, essential oils are very effective in relieving and calming pain associated with inflammation. Their anti-inflammatory properties make them a preferred solution for fighting these ailments that complicate your daily life.

ARVEA pain relief cream concentrates several essential oils with anti-inflammatory and analgesic properties: eucalyptus, rosemary, juniper, lavender, and clove bud to soothe joint and muscle inflammations and pains.

Effectively reduces muscular, joint, and post-traumatic inflammations.

يخفف بشكل فعال التهابات العضلات، المفاصل وما بعد الكدمات.

Advice

Can be used for children from the age of 6 by mixing a hazelnut-sized amount of pain relief cream with a few drops of olive oil before applying.

BODY HYGIENE ADVICE

Personal hygiene is essential as it helps:

- Preserve the physiological functions of the skin (sweating, secretions, etc.).
- Keep the skin clean and healthy, prevent the growth of microbes, and avoid unpleasant body odors and skin diseases.
- For each body part, there is a specific hygiene product. It is not appropriate to use the same product for the body, hands, and intimate zone, as each part has its own sensitivity, corresponding pH, and specific needs.

HYGIENE

BODY

**A CHILLING
FRESHNESS
IN THE SHOWER:**
BUT WHAT IS
EXACTLY ITS
NATURAL SECRET?

For people with active lifestyles or during hot seasons, an icy freshness in the shower is desired. Among the natural ingredients that provide this sensation, we find peppermint oil, which refreshes and invigorates with its intensely cooling power, guaranteeing an ice-like effect due to its high menthol content. Tonic and stimulating, it also provides vitality and energy, especially in times of fatigue.

HYGIENE

BODY

GOOD PRACTICES FOR EFFECTIVE **INTIMATE HYGIENE**

- Use a specific intimate hygiene product. Avoid using shower gel or regular soap for intimate cleansing.
- Perform intimate cleansing by hand. Avoid using gloves or washcloths as they can harbor bacteria.
- Always wash and wipe from front to back to avoid contaminating the intimate zone from the anal zone.
- Avoid vaginal douching as it disrupts the natural vaginal flora and promotes infections.
- Limit the number of intimate washes to twice a day.
- After each cleansing, make sure to rinse thoroughly and dry gently without rubbing.

WHAT IS Superfatted Soap?

Superfatted soap is a soap enriched with butters or vegetable oils such as shea butter, sweet almond oil, argan oil, or olive oil. This gives it not only cleansing properties but also moisturizing, emollient, and nourishing properties, contributing to the formation of a protective film on the skin.

Thanks to its characteristics, Superfatted soap can be used for cleansing the face and body regardless of the skin type. Moreover, it is suitable for all ages, from babies to the elderly.

WHY **CLEANSE** YOUR FACE?

The skin on your face is exposed to various impurities throughout the day, such as pollution, dust, sweat, and residues from cosmetic products. Additionally, the skin continuously renews itself by producing its own waste, including excess sebum and dead cells. If these residues are not eliminated daily through proper facial cleansing, your skin may lose its radiance. Dull complexion, frequent appearance of excess sebum, and the development of imperfections can occur as a result.

RECOMMENDATIONS FOR GOOD **ORAL HYGIENE**

- Brush your teeth twice a day for 2 minutes each time, and do not exceed three brushings per day.
- Use dental floss or interdental brushes before brushing.
- Visit the dentist at least once a year, starting from the age of 1 year.
- Adopt a varied and balanced diet.
- In addition to brushing:
 - Chew sugar-free gum after each meal.
 - Use an alcohol-free mouthwash as a hygiene complement.

WHY A NIGHT CREAM ?

During the day, the skin is in "defense" mode. Therefore, it needs a protective cream. As for the night, it is in "repair" mode, hence the necessity of a night cream packed with active ingredients. This latter will help the skin rehydrate, firm up, and restore the natural beauty of the face during sleep.

SKIN HYDRATION & HYALURONIC ACID:

The Key to Radiant
and Youthful Skin

The secret to healthy, radiant, supple, and youthful-looking skin is hydration. At the heart of this quest for well-hydrated skin lies a miracle ingredient: hyaluronic acid. It is more than just a simple component; it is a true source of youth for the skin. Hyaluronic acid, a molecule naturally present in our bodies, is widely recognized for its hydrating and anti-aging properties. It acts like a sponge, attracting and retaining moisture, allowing the skin to maintain an optimal level of hydration. Over time, the natural production of hyaluronic acid decreases, which can lead to dehydration, loss of firmness, and the appearance of wrinkles. There are different sizes of hyaluronic acid molecules, each playing a specific role in skin hydration:

- High molecular weight hyaluronic acid for surface hydration.
- Medium molecular weight hyaluronic acid that penetrates a bit deeper into the skin and maintains long-lasting hydration.
- Low molecular weight hyaluronic acid with enhanced penetration capacity into the deeper layers of the skin.

The combined use of different sizes of hyaluronic acid allows targeting different layers of the skin, from the surface to the deepest layers.

CARE

EXPERT

DRY SKIN

& ITS SPECIFIC SKINCARE ROUTINE

Dry skin, also known as “cutaneous Xerosis”, is a skin type linked to hydrolipid balance disorder which results in a lack of lipids and hydration. This imbalance leads to a sensation of dryness, tightness, and sometimes skin discomfort.

Dry skin shows up in various forms, ranging from mild dryness to more severe dryness, often accompanied by sensitivity, redness, itching, and / or flakiness.

As a result, dry skin requires special attention through a tailored and specific skincare routine. The **HYDRA-DEEP** product line for dry and sensitive skin offers a comprehensive routine that includes gentle cleansing, followed by an intensive treatment, and finally, a specific skincare step to perfect the routine.

HOW TO PROTECT YOURSELF EFFECTIVELY !!!

The sun, a source of life and vitality, also presents challenges for the skin and hair. Exposure to UV rays without protection can have harmful effects in the short and long term. That's why comprehensive sun protection is much more than just a beauty step; it's a commitment to long-term health and beauty. To achieve this, and before venturing out into the radiant sun, it is necessary to apply sun protection for the skin (face and body) on all exposed zones, including some often-forgotten areas such as the neck, shoulders, and even the backs of hands and feet, as well as the hair.

ARVEA's SUN PROTECT is a complete range that offers **high-level sun protection products with SPF 50+** for the face and body, a multi-protection product (UV (SPF 30), salt, and chlorine) for the hair, and a refreshing touch to fully enjoy the sun safely.

WHY IS IT
IMPORTANT
TO TAKE CARE OF
YOUR HANDS?

Hands are the most solicited and exposed part of the body, facing various aggressions such as (cold, dryness, irritations from household chemicals) and skin aging. As a result, they deserve special attention. Hence, the necessity of frequently using a cream specifically formulated for hand care to prevent the skin from becoming rough and thick, to combat dryness and redness, and to slow down skin aging.

FRESHNESS

MEN'S SKIN

Men's skin is about 10% thicker than women's skin and contains more collagen. Men therefore see the signs of aging appear later than women. However, once the first signs of aging do appear, the situation changes, and wrinkles become more pronounced! On the other hand, the top layer of a man's skin is thinner than that of a woman, making it more sensitive to external aggressions.

HOW TO DETERMINE **HAIR TYPE?**

OILY, NORMAL, DRY, OR COMBINATION HAIR?

OILY HAIR:

Becomes greasy within a few hours or the day after washing with shampoo. It is sticky, heavy, and can be prone to dandruff.

NORMAL HAIR:

Normal Hair: Starts to get oily 2 to 3 days after washing. This type of hair doesn't have any particular issues. It is light, soft, shiny, flexible, and easy to detangle.

DRY HAIR:

Dry Hair: Characterized by a very low amount of natural oils (sebum). It tends to have split ends, is fragile, prone to breakage, lacks shine, and easily tangles. The scalp might experience itchiness and dandruff due to a lack of sebum.

COMBINATION HAIR :

Combination Hair (oily at the roots and dry at the ends): Displays an excess of sebum at the roots, while the lengths and ends are dry. The roots become oily quickly after washing, while the lengths are hard to detangle.

ADAPTING HAIR CARE ACCORDING TO HAIR TYPE

SELECT A SHAMPOO THAT
MATCHES YOUR HAIR TYPE

USE A NOURISHING HAIR

WHAT EXACTLY ARE **BODY SPLASH & SHIMMER BODY SPLASH**

Derived from an Anglo-Saxon trend, body splash or body mist are the new beauty accessories “must-haves” in your collection. Much lighter than “eau de parfum” or “eau de toilette”, they have many advantages. Practical and easy to carry in a bag, they can be applied at any time of the day to perfume, refresh, and hydrate. The lightness of their scent notes allows for multiple usages throughout the day to revitalize, rather like a makeup touch-up.

Furthermore, the scents used can complement those of shower gels, shower body lotions, or body lotions to extend and prolong their beneficial notes after a shower or body care routine. They can even be applied to the hair to mask everyday odors (pollution, cigarette smells, etc.).

Shimmer body splash, on the other hand, is adorned with glitters of various sizes and colors to illuminate the skin and provide a captivating, sparkling look. These scented gems also envelop the body in a dazzling veil that awakens the senses and captivates attention. Whether it's for a special evening, a gathering with friends, or simply to add radiance to the skin during the day, these glitters enhance the body and add a magical dimension to one's appearance.

**RADIANT
SKIN**

**SHIMMERING
REFLECTION**

Envelops the skin with a trail of a suave scent based on Tahitian vanilla fragrance that awakens the senses.

Provides moisturizing benefits.

يحيط الجسم بعطر شهيت متكوّن أساساً من الفانيليا التاهيتية التي توقظ الحواس. يوفر مزايا مرطبة.

يحيط الجسم بروائح لا تقاوم.
له فوائد مرطبة.

Advice

Apply Body Splash after
using the **Royal Butter** on
the skin : the scent last
longer on an oily, unscented
substance.

HOW TO APPLY PERFUME?

Spray directly onto cleansed skin, holding the bottle 10 to 20 centimeters away and targeting pulse points (inside wrists, under the earlobe, ...).

If you have sensitive skin, spray your clothes or try the perfume cloud technique: spray the perfume in front of you to form a cloud and walk through it to be delicately and evenly scented.

Do not spray on damaged or irritated skin.

Avoid using perfume on parts of the body where you sweat the most. Choose two right spots to leave an olfactory imprint.

Do not rub the perfume onto the skin to make it dry quickly, as this prevents its scent from properly unfolding.

Use only one perfume at a time.

It's normal to no longer smell your perfume as intensely as in the beginning, after wearing it for a long time. The sense of smell, like most senses, focuses more on less familiar smells.

So, what to do in this case?

It's quite simple: trick your perfume! Changing your fragrance for a week will allow your nose to decondition itself for a beautiful reunion when you wear it again.
